

LOADBUSTER TOOL REFURBISHING SERVICES

As with all mechanical devices, Loadbuster®—The S&C Loadbreak Tool requires maintenance to ensure continued performance and operational safety. S&C offers Loadbuster tool inspection and refurbishment services so you can be confident your device will operate safely.

SCOPE of S&C INSPECTION/REFURBISHMENT SERVICES

Loadbuster tool service is applicable within 20 years of the original manufacture date. The inspection and repair tests include:

- 25 successful mechanical operations
- Voltage withhold for 12 seconds
- 500-pound static load test
- Successful continuity test

ADVANTAGES of S&C INSPECTION/REFURBISHMENT SERVICES

The Loadbuster tool is inspected and tested using **original specifications and factory requirements.**

Original parts are used to maintain **optimal performance.**

Factory inspection and refurbishment to original specifications **ensures proper operation for safety.**

Worn parts are **sustainably disposed of** and not landfilled, which **helps our environment.**

Each refurbished Loadbuster tool comes with a **one-year factory warranty.**

Refurbishment Rotation Plan

Keep your investment operating properly through a periodic refurbishment-rotation program. The program guarantees each Loadbuster tool will be inspected and repaired, if necessary, using the services described above. The program is designed to your specific needs.

New Loadbuster Tool Extended Warranty

When purchasing a new Loadbuster tool, consider an extended warranty, which covers repairs for damage sustained during normal operation, including repair parts, labor, and testing. It also includes the inspection/refurbishment service at the end of the extended warranty term.
