## Specifications

## Conditions of Sale

STANDARD: The seller's standard conditions of sale set forth in Price Sheet 150 apply, except as modified by the "Special Warranty Provisions" and "Warranty Qualifications" sections in this specification bulletin.

## SPECIAL TO THIS PRODUCT:

INCLUSIONS: 6801 Automatic Switch Controls combine sophisticated automatic control schemes with a remote terminal unit (RTU) functionality, data logging, and advanced communication capabilities in a single package. Models are available for outdoor pole and pad mounting. The 6801 switch control manages distribution switches and can automatically sectionalize a feeder based on such factors as overcurrent, loss of voltage, and phase unbalance. One switch control can automate one switch, and multiple controls can be programmed to communicate with each other using the optional IntelliTeam® ${ }^{\circledR}$ SG Automatic Restoration System.

The IntelliTeam SG Automatic Restoration System allows multiple switch controls to work together in teams using peer-to-peer communication and quickly transfer load to minimize the number of customers affected by a fault or outage. The system uses distributed intelligence; no central processing or SCADA is required (though fully supported). Different types of switches, reclosers, and controls can be included in the same team.

Utility personnel can communicate with the 6801 switch control to identify and isolate faults and restore servicewith or without a SCADA master station. Distributed Network Protocol (DNP) 3.0 is the supported protocol, and two $\mathrm{S} \& \mathrm{C}$-approved radios can be installed inside the enclosure-one for an automation network and one as a SCADA getaway radio. An approved radio or a fiber-optic modem are the recommended communication devices for use with the IntelliTeam SG Automatic Restoration System.

The 6801 switch control provides true RMS voltage and current readings. Over the operating temperature range of $-40^{\circ} \mathrm{F}\left(-40^{\circ} \mathrm{C}\right)$ to $+158^{\circ} \mathrm{F}\left(+70^{\circ} \mathrm{C}\right)$, current readings are accurate to $\pm 0.5 \%$ full scale, with a resolution of 1 ampere, RMS; voltage readings are accurate to $\pm 0.5 \%$ full scale, with a resolution of 0.1 Vac . Phase-angle readings are
accurate to $\pm 1^{\circ}$ at $5 \%$ of full-scale current, with a resolution of $1 / 8^{\circ}$. The switch controls have a current sensor input range of 0 to 800 amperes, RMS.

The 6801 switch control is configured specifically for fault detection. Over the overcurrent fault-detection range of 0 to 4000 amperes, RMS, overcurrent readings are accurate to $\pm 0.5 \%$ full scale, with a resolution of 1 ampere, RMS.

The 6801 switch control has extensive data-logging capabilities. Voltage, current, and kvars are logged every 15 minutes for one month; daily maximum and minimum voltage, current, kvars, and power factor are logged for one year. Overcurrent, loss-of-voltage, and fault magnitude and duration data, as well as equipment diagnostics, are also recorded. A crystal-controlled, temperature-compensated clock (GPS is optional) provides accurate time-stamping of the data. The information collected at the switch location is invaluable for analyzing problems on the circuit, troubleshooting, optimizing performance of the installation, and planning for future requirements. With IntelliTeam SG system-equipped controls, data logging is especially useful for determining the sequence of events during a team reconfiguration and for comparing the information with substation data.

A PC using the Windows ${ }^{\circledR} 10$ operating system can be connected via a DB9, or USB faceplate connector and IntelliLink ${ }^{\circledR}$ Setup Software used to view real-time data, manage setpoints, troubleshoot, and download historical data for reports. Setpoints and data can also be accessed remotely using S\&C's WinMon Graphical User Interface or IntelliLink Setup Software.

The 6801 switch control uses a single power supply and battery, eliminating the problems inherent in controls with multiple power supplies and batteries. This highly efficient power supply delivers $12-\mathrm{Vdc}$ to the entire system and supplies $24-V d c$ temperature-compensated battery charging and float charging to maximize battery life. The battery condition is periodically checked under varying loads. Detailed information on battery and power-supply status is available at the faceplate liquid-crystal display and is accessible at remote locations in communication-device-equipped controls.

6801 switch controls for use with S\&C switching devices can accept control power from a 100 - to 135 -Vac or 200- to 270 -Vac source or from S\&C sensor outputs. If both ac and sensor sources are available, the control automatically uses control power and switches to sensor power if control power is lost.

## Automatic Sectionalizing

The 6801 switch control has automatic sectionalizing capabilities that can improve circuit reliability when coordinated with source-side reclosing devices. The switch control can help reduce loss of service and locate faulted line sections. A switch control equipped with IntelliTeam SG system automatic circuit reconfiguration can provide full restoration of unaffected customer loads, if circuit capacity will allow it.

## Shots to Lockout

The selectable Shots-to-Lockout feature prevents the source-side protective device from reclosing into a fault multiple times.

## Loss of Phase

The 6801 switch control protects three-phase loads from single-phasing by automatically opening the switch. The control can be programmed to automatically reclose the switch when three-phase voltage returns.

## Hot Line Tag

A Hot Line Tag can be set with either a SCADA command or with a configurable button on the faceplate. It can only be cleared by the command type used to set it.

## Switching Devices Supported

The 6801 switch control supports the following switching devices:

- Scada-Mate ${ }^{\circledR}$ SD Switching System
- Scada-Mate ${ }^{\circledR}$ Switching System
- Scada-Mate CX ${ }^{\text {TM }}$ Switching System
- Other specific switching devices listed in Table 2 on page 4
For applicability to other switching devices, refer to your nearest S\&C Sales Office.

EXCLUSIONS: The 6801 Automatic Switch Control does not include a communication device, antenna, or antenna connections.

For non-IntelliTeam SG system applications, S\&C may be able to furnish and install in the 6801 Automatic Switch Control or make provision for a customer-specified communication device not listed in Table 6 on pages 6 through 8. S\&C will need to evaluate the physical and electrical requirements of the communication device and its performance characteristics and conduct qualification testing to verify its suitability for the desired application. Refer to the nearest S\&C Sales Office for scheduling information. S\&C cannot furnish or install any communication device for which the supplier requires $\mathrm{S} \& \mathrm{C}$ to offer Tier I (i.e., "help desk") support.
OPTIONS: Refer to the Table 6 on pages 6 through 8 for options deviating from the "base" control.
SPECIAL WARRANTY PROVISIONS: The standard warranty contained in the seller's standard conditions of sale, as set forth in Price Sheet 150, applies to the 6801 Automatic Switch Control, except that the first paragraph of said warranty is replaced by the following:
(1) General: The seller warrants to the immediate purchaser or end user for a period of 10 years from the date of shipment that the equipment delivered will be of the kind and quality specified in the contract description and will be free of defects of workmanship and material. Should any failure to conform to this warranty appear under proper and normal use within 10 years after the date of shipment the seller agrees, upon prompt notification thereof and confirmation that the equipment has been stored, installed, operated, inspected, and maintained in accordance with recommendations of the seller and standard industry practice, to correct the nonconformity either by repairing any damaged or defective parts of the equipment or (at the seller's option) by shipment of necessary replacement parts. The seller's warranty does not apply to any equipment that has been disassembled, repaired, or altered by anyone other than the seller. This limited warranty is granted only to the immediate purchaser or, if the equipment is purchased by a third party for installation in third-party equipment, the end user of the equipment. The seller's duty to perform under any warranty may be delayed, at the seller's sole option, until the seller has been paid in full for all goods purchased by the immediate purchaser. No such delay shall extend the warranty period.

Replacement parts provided by seller or repairs performed by seller under the warranty for the original equipment will be covered by the above special warranty provision for its duration. Replacement parts purchased separately will be covered by the above special warranty provision.
WARRANTY QUALIFICATIONS: Warranty of the 6801 Automatic Switch Control is contingent upon the installation, configuration, and use of the control or software in accordance with S\&C's applicable instruction sheets. This warranty does not apply to major components not of S\&C manufacture, such as batteries, communication devices, and remote terminal units. However, S\&C will assign to the immediate purchaser or end user all manufacturers' warranties that apply to such major components.
END USER LICENSE AGREEMENT: The end user is granted a nontransferable, non-sublicensable, non-exclusive license to use the LinkStart Connection Management Software, IntelliLink Setup Software, IntelliTeam ${ }^{\circledR}$ Automatic Restoration System software, automatic sectionalizing software, and/or other software furnished with the 6801 Automatic Switch Control only upon acceptance of all the terms and conditions of the seller's end user license agreement set forth in Price Sheet 155.

## How to Order

Complete the following steps to build a 6801 Automatic Switch Control catalog number. Included with the steps are fill-in boxes to help keep track of the various components of the final catalog number.
Note: Pay strict attention to the various footnotes, which identify constraints and considerations regarding the selection of the various options.

STEP 1. Obtain the switch control catalog number from Table 1 on page 4.

Catalog Number: $\square$
STEP 2. Select a switching device from Table 2 on page 4.

STEP 3. Select the control software from Table 3 on page 4.

STEP 4. Select the mounting from Table 4 on page 5.

STEP 5. (Optional) Obtain the software catalog number from Table 5 on page 5 .

Catalog Number:

STEP 6. (Optional) Select options from Table 6 on pages 6 through 8 and from Table 7 (options for gateway applications) on page 9.

STEP 7. (Optional) Obtain the catalog numbers for any desired accessories from Table 8 on page 10.

Catalog Number:

Example: The catalog number for a 6801 Automatic Switch Control to be used to operate and control one Scada-Mate Switch, with a pole-mounted padlockable corrosion-resistant aluminum enclosure, and a GPS module with a bottom mounted N-type $902-928-\mathrm{MHz}$ $5-\mathrm{dB}$ GPS antenna is:

| 6 | 8 | 0 | 1 | -F | 0 | 1 | H | 9 | J | B | 1 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |

Table 1. 6801 Automatic Switch Control

| Item(1) | Control Source | Number of <br> Switching <br> Devices Controlled | Catalog Number |
| :---: | :---: | :---: | :---: |
| 6801 Automatic Switch Control | 100 to $135 \mathrm{Vac}, 50 / 60 \mathrm{~Hz}$ or <br> 200 to $270 \mathrm{Vac}, 50 / 60 \mathrm{~Hz}$ | One | 6801 |

(1) Communication device, antenna, and antenna connections are not included. Switching device, control software, and mounting must be specified from the tables below.

Table 2. Switching Device—Must Be Specified

| Switching Device | Suffix to Be Added to Switch <br> Control Catalog Number |
| :--- | :---: |
| Scada-Mate SD Switching System <br> Scada-Mate Switching System <br> Scada-Mate CX Switching System |  |
| Mini-Rupter® Switch in Remote Supervisory PME Pad-Mounted Gear | -F01 |
| Mini-Rupter Switch in Remote Supervisory PMH Pad-Mounted Gear | - F02 |
| Alduti-Rupter® Switch with AS-1A or AS-10 Switch Operator | - -F03 |
| Cooper GWC Sectionalizer(1) | - F05 |
| Cooper F Switch(1 | - F30 |

(1) Requires input sensing provided by three Lindsey current and voltage sensors, suffix "-K5," or one potential transformer and three 1000:1 current sensors, suffix "-K8." See Table 6 on page 6.

Table 3. Control Software-Must Be Specified

| Control Software ${ }^{1}$ | Applicable to Switching Device | Suffix to Be Added to Switch Control Catalog Number |
| :---: | :---: | :---: |
| 6801 | Scada-Mate SD Switching System, <br> Scada-Mate Switching System, or <br> Scada-Mate CX Switching System, with voltage sensing on one side of the switch | -H9 |
| 6801 DualVoltage | Scada-Mate SD Switching System, <br> Scada-Mate Switching System, or <br> Scada-Mate CX Switching System, with voltage sensing on one side of the switch | -H10 |
| 6801 Universal | Alduti-Rupter Switch with AS-1A or AS-10 Switch Operator Cooper GWC Sectionalizer Cooper F Switch | -H11 |
| 6801 Pad-Mount | Mini-Rupter Switch in Remote Supervisory PME Pad-Mounted Gear Mini-Rupter Switch in Remote Supervisory PMH Pad-Mounted Gear | -H14 |

(1) Includes Bronze access-level IntelliTeam SG system license. IntelliTeam ${ }^{\circledR}$ Designer configuration and license management software is required to configure the IntelliTeam SG Automatic Restoration System and is not included. A Gold access-level IntelliTeam SG
system license is required to enable IntelliTeam $®$ II Automatic Restoration System compatibility mode. Refer to S\&C Specification Bulletin 1044-31.

Table 4. Mounting—Must Be Specified

| Mounting | Suffix to Be Added to <br> Switch Control Catalog Number |
| :--- | :---: |
| No enclosure | -JB0e |
| Pole mounting, in a padlockable corrosion-resistant aluminum enclosure; <br> 18 inches $(457 \mathrm{~mm}) \mathrm{W} \times 24$ inches $(610 \mathrm{~mm}) \mathrm{H} \times 91 / 2$ inches $(241 \mathrm{~mm}) \mathrm{D}$ | -JB1 |
| Pole mounting, in a padlockable corrosion-resistant aluminum enclosure with cable protection box, box <br> door hinged on bottom; 18 inches $(457 \mathrm{~mm}) \mathrm{W} \times 47$ inches $(1,194 \mathrm{~mm}) \mathrm{H} \times 91 / 2$ inches $(241 \mathrm{~mm}) \mathrm{D}$ | -JB6 |

- Only available with suffixes "-H11" or "-H14."

Table 5. Optional Software

| Software | Catalog Number |
| :--- | :---: |
| IntelliTeam® II Automatic Restoration System Software License. Use this license for IntelliNode™ |  |
| Interface Modules operating in an IntelliTeam II system with IntelliRupter® PulseCloser® Fault |  |
| Interupters, IntelliNode Interface Modules, 5800 Series Automatic Switch Controls, 6800 Series Automatic |  |
| Switch Controls, 6801M Automatic Switch Operators, and Universal Interface Modules. This license |  |
| includes an IntelliTeam Designer slot at no charge that must be entered as a separate line item. |  |
| The slot allows an easy upgrade to the IntelliTeam SG Automatic Restoration System at a later date. | $008-007106-026$ |
| Requires an IntelliTeam II system-qualified communication device from Table 6 beginning on page 6 |  |
| IntelliTeam® Designer slot. Included in above license | 008 |

- The 008-007106-02 license should not to be confused with IntelliTeam SG Automatic Restoration System operating in IntelliTeam II mode. An IntelliTeam SG system operating in IntelliTeam II mode requires an IntelliTeam SG system-qualified communication device.

## 6801 Automatic Switch Control

Table 6. Options

| Item |  | Suffix to Be Added to Switch Control Catalog Number |
| :---: | :---: | :---: |
| Wi-Fi module with antenna, for wireless setup (Not available outside the United States and Canada. Contact S\&C for options in other countries.) |  | -A3 |
| GPS module (includes top-mount GPS antenna) |  | -A4 |
| Wi-Fi/GPS module with antennae (Wi-Fi and GPS), for wireless setup (Not available outside the United States and Canada. Contact S\&C for options in other countries.) |  | -A5 |
| Sensing inputs (sensors not included) | Three S\&C Current/Voltage Sensors(1) | -K1 |
|  | Three Lindsey current/voltage sensors | -K5 |
|  | One potential transformer and three 1000:1 current transformers | -K8 |
|  | Three S\&C Current Sensors and six S\&C Voltage Sensors(1) | -K9 |
| Indicator option | Reversed colors for OPEN/CLOSED indicating lamps (green = closed, red = open) | -L1 |
| Foreign language labels, front panel and screens(2) | Spanish | -L51 |
|  | Portuguese | -L52 |
|  | French | -L53 |
|  | Chinese | -L54 |
|  | Arabic | -L55 |
| Optional software and communication features | Advanced cyber security options | -01 |
| Communication protocol | DNP 3.0 | -P0 |
| IntelliTeam SG, IntelliTeam II, and SCADA communication device and mounting (furnished by S\&C, requires suffix "-R98") | Factory-installed and wired iS5 Comm. Inc. - iES6-Slim with 2-SFP 100 Mbps multi-mode LC transceiver $550 \mathrm{~m}, 850 \mathrm{~nm}$, low voltage ( $9-36 \mathrm{Vdc}$ ) | -R287 |
|  | Factory-installed and wired iS5 Comm. Inc. - iES6-Slim with 2-SFP 100 Mbps multi-mode LC transceiver $2 \mathrm{KM}, 1310 \mathrm{~nm}$, low voltage ( $9-36 \mathrm{Vdc}$ ) | -R288 |
|  | Factory-installed and wired iS5 Comm. Inc. - iES6-Slim with 2-SFP 100 Mbps single-mode LC transceiver $10 \mathrm{KM}, 1310 \mathrm{~nm}$, low voltage ( $9-36 \mathrm{Vdc}$ ) | -R289 |
|  | Factory-installed and wired iS5 Comm. Inc. - iES6-Slim with 2-SFP 100 Mbps single-mode LC transceiver $30 \mathrm{KM}, 1310 \mathrm{~nm}$, low voltage ( $9-36 \mathrm{Vdc}$ ) | -R290 |
|  | Factory-installed and wired iS5 Comm. Inc. - iES6-Slim with 2-SFP 100 Mbps single-mode LC transceiver $60 \mathrm{KM}, 1310 \mathrm{~nm}$, low voltage ( $9-36 \mathrm{Vdc}$ ) | -R291 |
|  | Factory-installed and wired iS5 Comm. Inc. - iES6-Slim with 2-SFP 120 Mbps single-mode LC transceiver $100 \mathrm{KM}, 1550 \mathrm{~nm}$, low voltage (9-36 Vdc) | -R292 |
|  | Factory-installed and wired iS5 Comm. Inc. - iES6-Slim with 2-SFP 100 Mbps single-mode LC transceiver 120 KM, 1550 nm , low voltage ( $9-36 \mathrm{Vdc}$ ) | -R293 |

Footnotes to this table are on page 8.

Table 6. Options-Continued

| Item |  | Suffix to Be Added to Switch Control Catalog Number |
| :---: | :---: | :---: |
| SCADA communication device and mounting (furnished by S\&C, requires suffix "-R98") | MDS Transnet 900 Transceiver with diagnostics | -R19 |
|  | MDS NR104L IP Radio. Includes serial to Ethernet device server | -R71 |
|  | Telemetric DNP-RTMII-GSM Transceiver | -R161 |
|  | MDS SD9 Remote Radio | $\bullet$ |
|  | SpeedNet ${ }^{\text {TM }}$ Cell Edge Gateway 4G LTE Cellular Modem with removable SIM card for USA and Canada (shipped without SIM card)(3) | -R352 |
| IntelliTeam SG, IntelliTeam II, and SCADA communication device ready for (communication device furnished by customer)(4) | Provision only for iS5 Comm. Inc. - iES6-Slim - Customer needs to provide iES6-Slim with 2-SFP LC transceivers | -R285 |
|  | Provision only for Itron Bridge 5 (Gen 5) radio - Customer must provide/install Itron Bridge 5 radio | -R401 |
| SCADA communication device ready for (communication device furnished by customer)(4) | MDS 9810 Radio | -R02 |
|  | MDS 9710A Radio. For new systems | -R03 |
|  | MDS 9710B Radio. For existing systems | -R04 |
|  | MDS Transnet 900 Radio | -R07 |
|  | MDS 2710D Radio | -R27 |
|  | FreeWave FGR-115RC Radio | -R30 |
|  | MDS 2710 Radio | -R32 |
|  | Internal MDS iNET 900 Dual Gateway: Ethernet and serial remote | -R34 |
|  | FreeWave DTR-115RU Radio | -R35 |
|  | FreeWave FGR-09CSU Radio | -R36 |
|  | H\&L Model 570 Single-Mode Fiber-Optic Transceiver. Includes ST connectors(5) | -R137 |
|  | H\&L Model 570 Multi-Mode Fiber-Optic Transceiver. Includes ST connectors | -R138 |
|  | MDS SD9 Remote Radio | -R188 |
| Factory installation of communication device | Furnished by S\&C | -R98 |
|  | Furnished by customer | -R99 |
| Antenna connections (multiple types may be specified) | N -Type connector, bottom mounted. For remote antenna installation | -S2 |
|  | PolyPhaser® Surge Suppressor, N-type connector, bottom mounted. For remote and local antenna installation | -S3 |
|  | Antenex NMO mounting | -S4 |
|  | PolyPhaser Surge Suppressor, N-type connector, $800-2300 \mathrm{MHz}$. For dualband cellular antenna | -S6 |
|  | PolyPhaser Surge Suppressor for GPS antenna. Includes 4-foot (122-cm) cable | -S9 |
|  | Two N-Type connectors, bottom mounted. Includes suppressor | -S11 |
|  | PolyPhaser Surge Suppressor for LTE with N-type female connector (698-2700 MHz) | -S14 |

Footnotes for this table are on page 8.

Table 6. Options-Continued

| Item |  | Suffix to Be Added to Switch Control Catalog Number |
| :---: | :---: | :---: |
| Antenna | 902-928-MHz 5-dB gain antenna, N-type male connector | -T2 |
|  | LoPro Transit Antenna (6) | -T5 |
|  | Dual-band LoPro Cellular Antenna (824-896 and 1850-1990 MHz), 3 dBi | -T7 |
|  | Factory-installed top-mounted GPS | -T9 |
|  | Antenna, high-efficiency MLPV LTE (698-2700 MHz), permanent mount, 3dB gain, no ground plane | -T25 |
| Control power | From potential transformer, 100- to 135-Vac source(7) | -W1 |
|  | From sensors | -W2■ |
|  | From potential transformer, 200- to 270-Vac source ${ }^{7}$ | -W3 |

(1) When applying S\&C sensors at system voltages below 11.3 kV phase to phase, the "W1" option must be specified. Total maximum continuous power is 12 watts. This is the available power for all communication equipment installed in the switch control. A maximum peak transmit of 27 watts for up to 250 milliseconds is allowed, but the average power draw must not exceed 12 watts, including a transmission peak. Refer to the nearest S\&C Sales Office if more than one communication device is to be installed in the control.
(2) Labels will add four weeks to lead time. Contact the nearest S\&C Sales Office for front panel and screen availability.
(3) See S\&C Specification Bulletin 1076-31 for SpeedNet Cell Edge Gateway antenna options.
(4) Total maximum continuous power is 12 watts. This is the available power for all communication equipment installed in the switch control. A maximum peak transmit of 27 watts for up to 250 milliseconds is allowed, but the average power draw must not exceed 12 watts, including a transmission peak. Refer to the nearest S\&C Sales Office if more than one communication device is to be installed in the control.
(5) H\&L Model 570 Single-Mode Fiber-Optic Transceiver can be used for IntelliTeam II system applications that do not include IntelliRupter PulseCloser Fault Interrupters. Refer to the nearest S\&C Sales Office for more information.
(6) Suffix "-S3" must be specified when choosing this option.
(7) Select this option when applying S\&C voltage sensors below 11.3 kV phase to phase.

- Specify the appropriate catalog number suffix based on the frequency band range and application for the radio from the following table. For example, for a 928- to $960-\mathrm{MHz}$ MDS SD9 Radio for Ethernet and Serial application, specify catalog number suffix "-R216CL."

| Frequency Band Range, MHz | Application | Suffix to be Added to Catalog Number |
| :---: | :---: | :---: |
| 820 to 870 | Serial | -R216AK |
| 928 to 960 |  | -R216CK |
| 928 to 960, 50-kHz channel |  | -R216DK |
| 880 to 915 |  | -R216EK |
| 880 to $915,50-\mathrm{kHz}$ channel |  | -R216FK |
| 850 to 860 / 926 to 936 , transmit low |  | -R216GK |
| 850 to 860 / 926 to 936 , transmit high |  | -R216HK |
| 820 to 870 | Ethernet and serial | -R216AL |
| 928 to 960 |  | -R216CL |
| 928 to 960, 50-kHz channel |  | -R216DL |
| 880 to 915 |  | -R216EL |
| 880 to $915,50-\mathrm{kHz}$ channel |  | -R216FL |
| 850 to 860 / 926 to 936 , transmit low |  | -R216GL |
| 850 to 860 / 926 to 936, transmit high |  | -R216HL |
| 820 to 870 | 9710 emulation | -R216AM |
| 928 to 960 |  | -R216CM |
| 928 to 960, $50-\mathrm{kHz}$ channel |  | -R216DM |
| 880 to 915 |  | -R216EM |
| 880 to $915,50-\mathrm{kHz}$ channel |  | -R216FM |
| 850 to 860 / 926 to 936, transmit low |  | -R216GM |
| 850 to 860 / 926 to 936, transmit high |  | -R216HM |

■ Radio power is restricted when using control power from three voltage sensors at system voltages of 13.8 kV and lower. Refer to the nearest S\&C Sales Office for specific radio limitations.

Table 7. Options for Gateway Applications

| Item |  | Suffix to Be Added to Switch Control Catalog Number |
| :---: | :---: | :---: |
| Communication protocol | DNP 3.0 | -XP0 |
| Communication device (furnished by S\&C, requires catalog number suffix "-XR98") | Telemetric DNP-RTMII-GSM Transceiver | -XR161 |
|  | MDS SD9 Remote Radio | $\bullet$ |
| Communication device ready for (communication device furnished by customer) | MDS 9810 Radio | -XR02 |
|  | MDS 9710A Radio. For new systems | -XR03 |
|  | MDS 9710B Radio. For existing systems | -XR04 |
|  | MDS 2710D Radio | -XR27 |
|  | FreeWave FGR-115RC Radio | -XR30 |
| Factory installation of communication device | Furnished by S\&C | -XR98 |
|  | Furnished by customer | -XR99 |
| Antenna connections | N-type connector, bottom mounted. For remote antenna installation | -XS2 |
|  | PolyPhaser Surge Suppressor, N-type connector, bottom mounted. For remote antenna installation | -XS3 |
|  | Antenex NMO mounting | -XS4 |
|  | PolyPhaser Surge Suppressor, N-type connector, $800-2300 \mathrm{MHz}$. For dual-band cellular antenna | -XS6 |
|  | Two N-type connectors, bottom mounted. Includes suppressor | -XS11 |
| Antenna | $900-\mathrm{MHz} 5-\mathrm{dB}$ gain antenna. Includes N-type male connector | -XT2 |
|  | LoPro transit antenna | -XT5 |
|  | Dual-Band LoPro cellular antenna (824-896 and 1850-1990 MHz), 3 dBi | -XT7 |

- Specify the appropriate catalog number suffix based on the frequency band range and application for the radio from the following table. For example, for a 928 - to $960-\mathrm{MHz}$ MDS SD9 Radio for Ethernet and serial application, specify catalog number suffix "-XR216CL."

| Frequency Band Range, MHz | Application | Suffix to be Added to Catalog Number |
| :---: | :---: | :---: |
| 820 to 870 | Serial | -XR216AK |
| 928 to 960 |  | -XR216CK |
| 928 to 960, 50-kHz channel |  | -XR216DK |
| 880 to 915 |  | -XR216EK |
| 880 to $915,50-\mathrm{kHz}$ channel |  | -XR216FK |
| 850 to 860 / 926 to 936, transmit low |  | -XR216GK |
| 850 to 860 / 926 to 936, transmit high |  | -XR216HK |
| 820 to 870 | Ethernet and serial | -XR216AL |
| 928 to 960 |  | -XR216CL |
| 928 to 960, 50-kHz channel |  | -XR216DL |
| 880 to 915 |  | -XR216EL |
| 880 to $915,50-\mathrm{kHz}$ channel |  | -XR216FL |
| 850 to 860 / 926 to 936 , transmit low |  | -XR216GL |
| 850 to 860 / 926 to 936 , transmit high |  | -XR216HL |
| 820 to 870 | 9710 emulation | -XR216AM |
| 928 to 960 |  | -XR216CM |
| 928 to 960, 50-kHz channel |  | -XR216DM |
| 880 to 915 |  | -XR216EM |
| 880 to $915,50-\mathrm{kHz}$ channel |  | -XR216FM |
| 850 to 860 / 926 to 936 , transmit low |  | -XR216GM |
| 850 to 860 / 926 to 936 , transmit high |  | -XR216HM |

## 6801 Automatic Switch Control

Table 8. Accessories

| Description | Catalog Number |
| :---: | :---: |
| 6801 front panel field retrofit kit. For 5801 Automatic Switch Control | 903-002350-01 |
| 6801 front panel field retrofit kit with GPS. For 5801 Automatic Switch Control. Does not include antenna or cable (1) | 903-002350-02 |
| Wi-Fi module retrofit kit. For 6801 Automatic Switch Control. Includes Wi-Fi antenna | 903-002351-01 |
| Wi-Fi antenna, bottom mounted | 903-002345-01 |
| Spare 24-Vdc, 8-ampere-hour Gates battery | 591-000190-01 |
| Battery charger. For up to eight $24-\mathrm{Vdc}$ switch control batteries catalog number 591-000190-01 | 904-000057-01 |
| Ethernet switch kit. Includes one Sixnet SLX-5ES-1 and three 7-foot (213-cm) CAT6 cables②) | 903-002390-01 |
| SpeedNet remote antenna kit. Includes omnidirectional antenna, pole-mounted antenna arm, and 30-foot (914-cm) coaxial cable with connectors on both ends | 903-002132-02 |
| SpeedNet remote antenna kit. Includes omnidirectional antenna, pole-mounted antenna arm, and 50-foot (1524-cm) coaxial cable with connectors on both ends | 903-002132-03 |
| SpeedNet and cellular remote dual-antenna kit. Includes omnidirectional antennas, pole-mounted antenna arm, and two 30-foot ( $914-\mathrm{cm}$ ) coaxial cables with connectors on both ends | 903-002172-02 |
| SpeedNet and cellular remote dual-antenna kit. Includes omnidirectional antennas, pole-mounted antenna arm, and two 50-foot (1524-cm) coaxial cables with connectors on both ends | 903-002172-03 |
| GPS retrofit kit for field installation with 6801 Front panel retrofit kit with GPS. Does not include antenna or cable① | 903-002346-01 |
| GPS antenna, surface mount(3) | 007-001615-02 |
| Pole-mount antenna kit for GPS. Includes 25 -foot (762-cm) cable, mounting bracket, and antenna. Requires suffix "-S9" or Surge Suppressor catalog number 005-001471-01 | 903-002344-01 |
| Surge suppressor for remote GPS antenna | 005-001471-01 |
| FIC test fixture. Simulates overhead switch disconnect status and switch position | 906-000001-01 |
| Sensor output tester | 906-002168-01 |
| Portable test switch. Electronically operates Scada-Mate® SD, Scada-Mate $®$, or Scada-Mate CX ${ }^{\top}$ ™ Switching Systems, independently of switch control | 904-000050-01 |
| iS5 Comm. Inc. - iES6-Slim Industrial Ethernet switch (fully enclosed), comes with panel mount bracket, low-voltage (input 9-36 Vdc), LC connector | 110-003800-01 |
| SFP 100-Mbps multimode LC transceiver $550 \mathrm{~m}, 850 \mathrm{~nm}$ | 110-003774-01 |
| SFP 100-Mbps multimode LC transceiver 2 km , 1310 nm | 110-003774-02 |
| SFP 100-Mbps single-mode LC transceiver $10 \mathrm{~km}, 1310 \mathrm{~nm}$ | 110-003774-04 |
| SFP 100-Mbps single-mode LC transceiver $30 \mathrm{~km}, 1310 \mathrm{~nm}$ | 110-003774-05 |
| SFP 100-Mbps single-mode LC transceiver $60 \mathrm{~km}, 1310 \mathrm{~nm}$ | 110-003774-06 |
| SFP 100-Mbps single-mode LC transceiver 100 km , 1550 nm | 110-003774-07 |
| SFP 100-Mbps single-mode LC transceiver 120 km , 1550 nm | 110-003774-08 |
| iS5 Comm. Inc. - iES22GF industrial Ethernet switch, high voltage (Input 130-370 Vdc or 90-264 Vdc), 8 - 10/100/1000 base TX RJ45 Ports, 4 - GSFP | 110-003777-01 |
| iS5 Comm. Inc. - iES22GF industrial Ethernet switch, low voltage (Input 9-36 Vdc), 8-10/100/1000 Base TX RJ45 Ports, 4 - GSFP | 110-003778-01 |
| iS5 Comm. Inc. - iDS3 industrial single port RS232/422/485 to Ethernet serial device server, low voltage (input 9-36 Vdc), 1 - serial port and $2-10 / 100$ base TX RJ45 ports | 110-003779-01 |

(1) Use GPS antenna, surface mount catalog number 007-001615-01 or
(2) Sixnet SLX-5ES-1 has five RJ45 10/100 Ethernet ports.
pole-mounted antenna kit for GPS catalog number 903-002344-01.
(3) Top-mounted surface-mount antennas must be installed by S\&C.

Table 9. Current Phase Change Harness

| Description | Catalog Number |
| :--- | :---: |
| Current phase change harness—Phases ABC to Phases CBA | $007-001351-01$ |
| Current phase change harness—Phases ABC to Phases BAC | $007-001351-02$ |
| Current phase change harness_Phases ABC to Phases ACB | $007-001351-03$ |
| Current phase change harness_Phases ABC to Phases BCA | $007-001351-04$ |
| Current phase change harness_Phases ABC to Phases CAB | $007-001351-05$ |

Table 10. Voltage Phase Change Harness

| Description | Catalog Number |
| :--- | :---: |
| Voltage phase change harness—Phases ABC to Phases CBA | $007-001352-01$ |
| Voltage phase change harness—Phases ABC to Phases BAC | $007-001352-02$ |
| Voltage phase change harness_Phases ABC to Phases ACB | $007-001352-03$ |
| Voltage phase change harness_Phases ABC to Phases BCA | $007-001352-04$ |
| Voltage phase change harness_Phases ABC to Phases CAB | $007-001352-05$ |
