Instructions for Field Programming and Operation

**NOTICE**

To perform the field adjustment and programming procedures outlined in S&C Instruction Sheet 515-500 or 515-600, the correct access-code number must be entered into the source-transfer control when so directed. The access-code number is **6601**.

To protect the security of the installed Micro-AT Control, consider storing this instruction sheet addendum separate from the metal-enclosed gear or weatherproof enclosure installation.
